Technology

ESG Consulting GmbH

Livry-Gargan-Strasse 6
82256 Fürstenfeldbruck

ESG at number five in the top German technology consultancies and engineering service providers

ESG is one of the leading providers in the German technological consultancy market.

Fürstenfeldbruck, the 19th of December, 2007

In August 2007, Lünendonk GmbH from Bad Wörishofen presented their latest study into providers of technological consulting and engineering services. This data compilation is one of the most comprehensive collections of information addressing the "German technological consulting and engineering services" market, a previously under-researched sector. The study contains numerous, in-depth key figures, evaluations and interpretations of this market segment.

ESG Elektroniksystem- und Logistik-GmbH measured up well against its competitors in this study, making it to fifth place in the top 25 companies in the technological consulting and engineering services sector. Both the number of providers and domestic turnover in this economic sector have been rising steadily for years. This is symptomatic of the dynamic development of today's technology market in Germany.

ESG Consulting GmbH is a wholly owned subsidiary of ESG Elektroniksystem- und Logistik-GmbH, one of the leading system and software houses in Germany, which has been providing management consultancy services since 1967. Using proven frameworks and lean consulting programmes, we have successfully designed business processes and system landscapes for many companies from the high-tech and public sectors.
